DCM Shriram Limited

(Unit: Shriram Alkali and Chemicals-3, Jhagadia)
SIX MONTHLY ENVIRONMENT CLEARANCE COMPLIANCE REPORT
For the period of April'25 to September'25

[Letter no. SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024]

S.N	CONDITIONS/RECOMMENDATION	STATUS
	The proposal is for Environmental Clearance to M/s. DCM Shriram	Noted
	Limited at plot no. 753, Vil. GIDC Industrial Estate, Ta. Jhagadia, Dist.	
	BHARUCH. It is a proposed unit for manufacturing following products,	
	which falls in the category - 5(f) of the schedule of the EIA Notification-	
	2006	
A1	SPECIFIC CONDITION	
1	1233 KLD industrial effluent generated from Manufacturing Process	Noted & will be complied before startup of
	(792 KLD), Boiler Blow Down (9 KLD), Cooling Blow Down (332 KLD),	our process
	Washing (100 KLD), process shall be treated in ETP followed by UF/RO.	
	RO reject (246 KLD) shall be send to Recycling MEE with ATFD and RO-	
	2 Permeate (985 KLD) shall be reused in Cooling tower.	
2	PP shall provide and operate ETP having capacity of 1400 KLD for	Noted & will be complied before startup
	treatment of industrial wastewater.	
3	PP shall carry out CER activity of their project cost, as per their	Noted
	submission vide OM of MoEF & CC dated 1.5.2018 and its amendment	
	of Rs 7.95 Crore	
4	PP shall submit provisional copy of TSDF certificate with validity.	Noted
		We will obtain the TSDF certificate before
		start-up
5	Proponent shall submit approved conservation plan from competent	Noted & will be complied before startup
	authority for Schedule I species, as per their submission having total	
	conservation budget of Rs 37.94 Lakh.	
6	PP shall provide and operate ETP having capacity of 1400 KLD for	Noted & will be complied before startup of
	treatment of industrial wastewater.	our process
7	PP shall provide and operate STP having capacity of 50 KLD for	Noted & will be complied before startup of
	treatment of industrial wastewater.	our process
8	Proponent shall provide all fire prevention and safety measures for fire	Noted
	control, even though fire NOC is not mandatory of labour and skilled	We will consider and provide all fire
	department.	prevention and safety measures for fire
		control during operation phase
9	The PP shall develop green belt [14,565 Sq m (25%) inside plant	Noted & complied
	premises + 8,738 Sq m (15%) at GIDC Jhagadia (Outside plant premises)	We already developed green belt at outside
	= Total: 23,303 Sq. m.) i.e. 40% of total plot area]	of the plant premises.
		We will also develop it within premises after
		commissioning of the plant

10	ETP will be designed for 1400 KLD capacity, phase wise in modular fashion such that 15% additional capacity can be utilized if required.	Noted We will design the ETP as required before
	ETP designed with primary, secondary & tertiary treatment units along	start-up the process
	with UF/RO & MEE+ATFD for treatment of industrial effluent	
	generation.	
11	Out of 792 KLD of process wastewater, 528 KLD from epoxy process	Noted
	wastewater stream is being evaluated for stream segregation and	We will comply the condition before start-
	purification for reuse at Plot No. 749 as brine solution input for caustic	up
	soda electrolysis process at DCM Shriram Ltd (Chlor-Alkali Plant) as a	
	resource conservation opportunity.	
12	Sewage treatment plant of 50 KLD capacity is proposed for treatment	Noted
	of domestic sewage and treated sewage will be reused for gardening	We will provide the separate STP as
	purpose within premises.	required during operation phase
13	Proponent shall obtain PESO permission from competent authority	Noted
		We will obtain the required permissions
		from competent authority before start-up
14	Proposed industry falls under category of 5 (1) and falls in non CEPI area	Noted
	as per SEAC Recommendation.	
	Specific EC Conditions for (Synthetic organic Chemicals Industry)	
1	Construction Phase	
1.1	a) "Wind - breaker of appropriate height i.e. 1/3rd of the building height	Noted
	and maximum up to 10 motors shall be provided Individual building	
	and maximum up to 10 meters shall be provided. Individual building	We will comply with the condition before
	within the project site shall also be provided with barricades.	start-up
	·	
	within the project site shall also be provided with barricades. b) "No uncovered vehicles carrying construction material and waste	
	within the project site shall also be provided with barricades. b) "No uncovered vehicles carrying construction material and waste shall be permitted." c) "No loose soil or sand or construction & demolition waste or any other construction material that cause dust shall be left uncovered. Uniform piling and proper storage of sand to avoid fugitive emissions	
	within the project site shall also be provided with barricades. b) "No uncovered vehicles carrying construction material and waste shall be permitted." c) "No loose soil or sand or construction & demolition waste or any other construction material that cause dust shall be left uncovered. Uniform piling and proper storage of sand to avoid fugitive emissions shall be ensured." d) Roads leading to or at construction site must be paved and	
	within the project site shall also be provided with barricades. b) "No uncovered vehicles carrying construction material and waste shall be permitted." c) "No loose soil or sand or construction & demolition waste or any other construction material that cause dust shall be left uncovered. Uniform piling and proper storage of sand to avoid fugitive emissions shall be ensured." d) Roads leading to or at construction site must be paved and blacktopped (i.e. metallic roads). e) No excavation of soil shall be carried out without adequate dust	

	g) Grinding and cutting of building materials in open area shall be prohibited.	
	h) Construction material and waste should be stored only within earmarked area and road side storage of construction material and waste shall be prohibited.	
	i) Construction and demolition waste processing and disposal site shall be identified and required dust mitigation measures be notified at the site. (If applicable).	
2	SPECIFIC CONDITION	
2.1		
1	Unit shall install CEMS [Continuous Emission Monitoring System) in line to CPCB directions to all SPCB vide letter no. B-29016/04/06PCI-1/5401 dated 05/02/2014 for effluent discharge and air emission as per pollutants discharge/emission from respective project and an arrangement shall also be done for reflecting the online monitoring results on the company's server, which can be assessable by the GPCB/CPCB on real time basis. [For Small/Large/Medium (Red Category) & Whichever (Air emission & Effluent discharge) is applicable].	Noted We will install required CEMS as per CPCB guidelines after commissioning of the project
2	The National Ambient Air Quality Emission Standards issued by the Ministry vide G. S. R. No. 826 (E) dated 16th November, 2009 shall be complied with.	Noted We will comply with the condition before start-up
3	National Emission Standards for Organic Chemicals Manufacturing Industry issued by the Ministry vide G. S. R. 608 (E) dated 21/07/2010 and amended from time to time shall be followed.	Noted We will comply with the condition before start-up
4	Unit shall have to adhere to the prevailing area specific policies of GPCB with respect to the discharge of pollutants, and shall carry out the project development in accordance & consistence with the same.	Noted We will comply with the condition before start-up
5	All measures shall be taken to avoid soil and ground water contamination within premises.	Noted We will comply with the condition before start-up
6	a) PP shall obtain PESO permission for the storage and handling of	Noted We will comply with the condition before start-up
	hazardous chemicals. (If applicable). b) PP shall provide Occupational Health Centre (OHC) as per the provisions under the Gujarat Factories Rule 68-U.	

- c) PP shall obtain fire safety certificate / Fire No-Objection certificate (NOC) from the concern authority as per the prevailing Rules/Gujarat Fire Prevention and Life Safety Measures Act, 2016.
- d) Unit shall adopt functional operations/process automation system including emergency response to eliminate risk associated with the hazardous processes.
- c) PP shall carry out mock drill within the premises as per the prevailing guidelines of safety and display proper evacuation plan in the manufacturing area in case of any emergency or accident.
- f) PP shall install adequate fire hydrant system with foam trolley attachment within premises and separate storage of water for the same shall be ensured by PP.
- g) PP shall take all the necessary steps for control of storage hazards within premises ensuring incompatibility of storage raw material and ensure the storage keeping safe distance as per the prevailing guidelines of the concerned authority.
- h) PP shall take all the necessary steps for human safety within premises to ensure that no any harm is caused to any worker/employee or labour within premises.
- i) Flame proof electrical fittings shall be provided in the plant premises, wherever applicable.
- j) Unit shall never store drum/barrels/carboys of incompatible material/chemical together.
- k) Unit shall provide effective Isolation for Process area and storage of hazardous chemicals.
- I) The project management shall prepare a detailed Disaster Management Plan (DMP) for the project as per the guidelines from Directorate of Industrial Safety and Health.
- m) Unit shall obtain all required permissions from the Narcotics Control Bureau for manufacturing, storage and handling of Acetic Anhydride & any such chemicals.

	n) Provide double earthling to solvent storage tanks: (1) Unit shall provide effective fire hydrants, water monitors & foam application system at solvent storage tank farm area. (2) Unit shall provide adequate safety system such as water sprinklers, water curtains, foam pouring system etc. to restrict cascade fire emergency in solvent tank farm. o) Unit shall never store drum/barrels/carboys of incompatible material/chemical together.	
	p) Unit shall provide chlorine leakage control emergency kit and FRP hood with scrubber system for chlorine safety.	
	q) Unit shall provide safety valve and rapture disc, as well as auto dump or auto quench/, suppress system for exothermic reaction vessel safety.	
	WATER	
7	Total water requirement for the project shall not exceed 4520 KLD. Unit shall reuse 1214 KLD of treated effluent within premises. Hence, fresh water requirement shall not exceed 3256 KLD and it shall be met through GIDC water supply only. Prior permission from concerned authority shall be obtained for procurement of water.	Noted We will comply with the condition before start-up
8	The industrial effluent generation from the project shall not exceed 1233 KLD.	Noted We will comply with the condition before start-up
9	Management of Industrial effluent shall be as under:	Noted. We will meet the requirement during the
	1233 KLD industrial effluent generated from Manufacturing Process (792 KLD), Boiler Blow Down (9 KLD), Cooling Blow Down (332 KLD), Washing (100 KLD), process shall be treated in ETP followed by UF/RO. RO reject (246 KLD) shall be send to Recycling MEE with ATFD and RO-2 Permeate (985 KLD) shall be reused in Cooling tower. Thus there shall be no discharge of any industrial effluent into an	operation phase.
	environment like drain, land etc and shall maintained Zero Liquid Discharge (ZLD).	
10	Domestic wastewater generation shall not exceed 43.2 KL/day for proposed project and it shall be treated in STP. It shall not be disposed off into soak pit. Treated sewage shall be utilized for gardening and plantation purpose within premises after achieving on-land discharge norms prescribed by the GPCB	Noted. We will meet the requirement during the operation phase.

11	During monsoon season when treated sewage may not be required for	Noted.
	the plantation/Gardening/Green belt purpose, it shall be stored within	We will meet the requirement during the
	premises. There shall be no discharge of waste water outside the	operation phase.
	premises in any case.	
12	Unit shall provide buffer water storage tank of adequate capacity for	Noted.
	storage of treated waste water during rainy days.	We will provide the buffer water storage
		tank as per requirement
13	Complete Zero Liquid Discharge [ZLD) status shall be maintained all the	Noted.
	time and there shall be no drainage connection from the premises.	We will meet the requirement during the
		operation phase.
14	Unit shall feed wastewater to in-house MEE only after ensuring content	Noted.
	of effluent for COD/VOC so as not to get air borne during evaporation	We will meet the requirement during the
	in order to achieve no adverse impacts on Environment and Human	operation phase.
	Health	
15	Unit shall provide STP and ETP with adequate capacity.	Noted.
		We will provide STP and ETP as per
		requirement
16	The unit shall provide metering facility at the inlet and outlet of ETP and	Noted
	maintain records for the same.	We will provide metering facility as per
		requirement
17	Proper logbooks of ETP; reuse/ recycle of treated/ untreated effluent;	Noted
	chemical consumption in effluent treatment; quantity & quality of	We will comply with the requirement
	treated effluent; power consumption etc. shall be maintained and shall	
	be furnished to the GPCB from time to time.	
	AIR	
18	Unit shall not exceed fuel consumption for Boiler, Thermic Fluid Heater	Noted
	and D G Set as per the point no. 24 as mentioned above.	We will ensure to not exceed the fuel
		consumption as mentioned
19	PP shall use approved fuels only as fuel in Boiler, Thermic Fluid Heater	Noted
	and D G Set.	We will comply with the condition
20	Unit shall provide adequate APCM with flue gas generation sources to	Noted
	achieve the norms prescribed by GPCB.	We will install adequate APCM to meet with
		the requirement
21	Unit shall provide adequate APCM with process gas generation sources	Noted
	as the point no. 25 as mentioned above.	We will install adequate APCM to meet with
		the requirement
22	The fugitive emission in the work zone environment shall be monitored.	Noted
	The emission shall conform to the standards prescribed by the	We will comply with the requirement
	concerned authorities from time to time (eg. Directors of Industrial	
	Safety& Health). Following indicative guidelines shall also be followed	
	to reduce the fugitive emission.	

	Internal roads shall be either concreted or asphalted or paved properly to reduce the fugitive emission during vehicular movement.	
	Air borne dust shall be controlled with water sprinklers at suitable locations in the plant.	
	A green belt shall be developed all around the plant boundary and also along the roads to mitigate fugitive & transport dust emission.	
23	Regular monitoring of Volatile Organic Compounds (VOCs) shall be carried out in the work zone area and ambient air.	Noted We will comply with the requirement
24	For control of fugitive emission, VOCs, following steps shall be followed: a. Closed handling and charging system shall be provided for chemicals. b. Reflux condenser shall be provided over Reactors/Vessels. c. Pumps shall be provided with mechanical seals to prevent leakages. d. Air borne dust at all transfers operations/ points shall be controlled either by spraying water or providing enclosures.	Noted We will comply with the requirement
25	Solvent management shall be carried out as follows:	Noted We will comply with the requirement
	Measures shall be taken to reduce the process vapors emissions as far as possible. Use of toxic solvents shall be minimum. All venting equipment shall have vapour recovery system	we will comply with the requirement
	Reactor shall be connected to adequate chilling system to condensate solvent vapors and reduce solvent losses.	
	Reactor and solvent handling pump shall have mechanical seals to prevent leakages.	
	The condensers shall be provided with sufficient HTA and residence time so as to achieve maximum solvent recovery.	
	Solvents shall be stored in a separate space specified with all safety measures.	
	Proper earthing shall be provided in all the electrical equipment wherever solvent handling is done.	
	Solvent storage and handling area shall be flame proof. The solvent storage tanks thebe provided with breather valve to prevent losses.	

26	Close loop solvent recovery system with adequate condenser system	Noted
	shall be provided to recover solvent vapors in such a manner that	We will comply with the requirement
	recovery shall be maximum and recovered solvent shall be reused in	
27	the process within premises. Leak Detection and Repair (LDAR) program shall be prepared and	Noted
27	implemented as per the CPCB guidelines. LDAR Logbooks shall be	We will comply with the requirement
	maintained.	' '
28	Regular monitoring of ground level concentration of PM10, PM2.5,	Noted
	SO2, NOx, HCl, Cl2 and VOCs shall be carried out in the impact zone and	We will comply with the requirement
	its records shall be maintained. Ambient air quality levels shall not	
	exceed the standards stipulated by the GPCB. If at any stage these	
	levels are found to exceed the prescribed limits, necessary additional	
	control measures shall be taken immediately. The location of the	
	stations and frequency of monitoring shall be decided in consultation	
	with the GPCB.	
20	HAZARDOUS/SOLID WASTES:	Nistand
29	All the hazardous/ solid waste management shall be taken care as per	Noted
30	the point no. 32 and 33 as mentioned above.	We will comply with the requirement Noted
30	Authorized end-users shall have permissions from the concerned authorities under the Rule 9 of the Hazardous and Other Wastes	
	(Management and Transboundary Movement) Rules 2016.	We will ensure the compliance of the condition
31	Unit shall explore the possibilities for environment friendly methods	Noted
31	like co-processing of hazardous waste for disposal of Incinerable & land	We will explore the possibilities for
	fillable wastes before sending to CHWIF & TSDP sites respectively.	environment friendly methods to meet with
	made wastes before sending to envir a roof sites respectively.	the requirement
32	The project proponent has to obtain membership of TSDF site & CHWIF	Noted
	before obtaining CTO of GPCB.	We will obtain the required membership
		before start-up
33	STP sludge shall be collected and used as manure in gardening activity	Noted
	or send to TSDF site for landfilling	We will comply with the requirement
34	Management of fly ash shall be as per the Fly ash Notification 2009 &	Noted
	its amendment time to time and it shall be ensured that there is 100%	We will comply with the requirement
	utilization of fly ash to be generated from the unit.	
35	The unit shall submit the list of authorized end users of hazardous	Noted
	wastes along with MoU signed with them at least two months in	We will comply with the requirement
	advance prior to the commencement of production. In the absence of	
	potential buyers of these items, the unit shall restrict the production of	
	the respective items.	
	GREENBELT AREA	
36	The PP shall develop green belt (14,565 Sq m (25%) inside plant	Please refer condition A-1 (9) of
1		
	premises 8,738 Sq m (15 %) at GIDC Jhagadia (Outside plant premises) Total: 23,303 Sq. m.) i.e. 40% of total plot area) as submitted before	SEAC/GJ/IND3/458014/7503/2024 dated 12 th July-2024

	SEAC. Green belt shall be developed with native plant species that are	
	significant and used for the pollution abatement as per the CPCB	
	guidelines. It shall be implemented within 3 years of operation phase	
	in consultation with GPCB.	
	OTHERS:	
37	The project proponent shall carry out the activities of amount of Rs.	Noted
	7.95 Crores proposed under CER in surrounding village as per listed for	We have already initiated for Mangrove
	various programs. and it shall be part of the Environment Management	plantations in Jambusar block of Bharuch
	Plan (EMP) as per the MoEF&CC's OM no. F. No. 22-65/2017-4A.III	and Khambhat block of Anand as per
	dated 30.09.2020. This shall be monitored and the monitoring report	requirement.
	shall be submitted to the regional office of MoEF&CC as a part of half-	
	yearly compliance report and to the District Collector. The monitoring report shall be posted on the website of the project proponent.	
38	All the recommendations, mitigation measures, environmental	Noted
	protection measures and safeguards proposed in the EIA report of the	We will comply with the requirement
	project prepared by M/s. Kadam Environmental Consultants and	
	submitted by the project proponent and commitments made during	
	presentation before SEAC and proposed In the EIA report shall be	
	strictly adhered to in letter and spirit.	
3	Compliance And Administration/appeal Of EC Orders	
1	Project proponent shall inform to all the concerned authorities	Complied
	including Municipal Corporation and District Collector and shall also	We have already published through
	give wide publicity through advertisement in minimum two local	advertisement two local newspapers
	newspapers within seven days, about the Environment Clearance order	"Gujarat Samachar" on 16.07.2024 and
	accorded.	"Times of India" on 17.07.2024.
		M/s. DCM Shriram Limited ડિસીએમ શ્રીરામ લિમિટેડ
		PION NO. 753. GIDC Industrial Estate Jinggadia, District: Bhancher, Gujarat In Mortie England, Gujarat In Mortie In Mor

		M/s. DCM Shriram Limited Plot No. 753, GIDC Industrial Estate Jhagadia, District Bharuch, Gujarat NOTICE OF ENVIRONMENTAL CLEARANCE BY STATE ENVIROMENT IMPACT ASSESSMENT AUTHORITY (SEIAA), GUJARAT FOR SETTING UP OF PROPOSED MANUFACTURING PLANT OF SYNTHETIC ORGANICS & OTHER CHEMICALS Notice is hereby given, to all concerned & public at large that the setting up of proposed manufacturing plant of synthetic organics and other chemicals based on chlorine has been accorded environmental clearance from state level environment impact assessment authority, Gujarat vide its letter no. EC2482412G.ISA24052N dated 120712024 at above mentioned site. The copy of the said clearance letter is available at the registered office of the Organization, Gujarat Pollution Control Board & State Level Environment Impact Assessment Authority (SEIAA), Gujarat and may also be seen at website of the SEIAA in http://seiaa.gujarat.gov.in/
2	Project proponent shall appoint a key person in the organization who	Noted for the compliance
	shall be responsible for compliance of above condition fully on behalf	
	of the proponent. It will not mean that appointing a key person will	
	exempt the project proponent from the responsibility of compliance.	
	Any change in key person shall immediately be informed to SEIAA and	
	all concerned authorities.	N . 16 II 6 II 10
3	Designated key person shall submit six monthly compliance report to	Noted for compliance for the condition
	SEIAA/SEAC, MOEF&CC, GPCB and Nodal Department of the	
	Government.	Noted for the compliance
4	The Nodal Department or any authority or officer authorized by	Noted for the compliance
	MOEF&CC/SEIAA can inspect the site of the project and all the facilities, for verification of compliances of environment clearance conditions.	
5	In case of violation reported upon, the project proponent shall be	Noted for the compliance
5	responsible for all the legal actions as per Environment Protection Act,	Noted for the compliance
	1986 including SEIAA may cancel, withdraw or keep in abeyance, the	
	Environment Clearance accorded.	
6	Any person including the project proponent affected by this	Noted for the compliance
	Environment Clearance order may file appeal to Honorable National	The tea for the compliance
	Green Tribunal West Zone branch, Pune, preferably within a period of	
	thirty days from the date of issue of Environment Clearance as	
	prescribe under section 16 of National Green Tribunal Act 2010.	
7	All complains and public grievance or representations may be	Noted for the compliance
	addressed to SEIAA/SEAC in the email addresses (a)	
	msseiaagi@gmail.com& (b) seacgujarat@gmail.com	

Additional EC Conditions

S.N	CONDITIONS/RECOMMENDATION	STATUS
1	Unit shall install CEMS [Continuous Emission Monitoring System) in line to CPCB directions to all SPCB vide letter no. B-29016/04/06PCI-1/5401 dated 05/02/2014 for effluent discharge and air emission as per pollutants discharge/emission from respective project and an arrangement shall also be done for reflecting the online monitoring results on the company's server, which can be assessable by the GPCB/CPCB on real time basis. [For Small/Large/Medium (Red Category) & Whichever (Air emission & Effluent discharge) is applicable].	Noted We will install required CEMS as per CPCB guidelines after commissioning of the project
2	The National Ambient Air Quality Emission Standards issued by the Ministry vide G. S. R. No. 826 (E) dated 16th November, 2009 shall be complied with.	Please refer condition 2.1 (2) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
3	National Emission Standards for Organic Chemicals Manufacturing Industry issued by the Ministry vide G. S. R. 608 (E) dated 21/07/2010 and amended from time to time shall be followed.	Please refer condition 2.1 (3) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
4	Unit shall have to adhere to the prevailing area specific policies of GPCB with respect to the discharge of pollutants, and shall carry out the project development in accordance & consistence with the same.	Please refer condition 2.1 (4) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
5	All measures shall be taken to avoid soil and ground water contamination within premises.	Please refer condition 2.1 (5) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
6	Safety & Health: a. PP shall obtain PESO permission for the storage and handling of hazardous chemicals. (If applicable).	Please refer condition 2.1 (6) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
	b. PP shall provide Occupational Health Centre (OHC) as per the provisions under the Gujarat Factories Rule 68-U.	
	c. PP shall obtain fire safety certificate/Fire No-Objection certificate (NOC) from the concern authority as per the prevailing Rules/Gujarat Fire Prevention and Life Safety Measures Act, 2016.	
	d. Unit shall adopt functional operations/process automation system including emergency response to eliminate risk associated with the hazardous processes.	
	e. PP shall carry out mock drill within the premises as per the prevailing guidelines of safety and display proper evacuation plan in the manufacturing area in case of any emergency or accident.	

- f. PP shall install adequate fire hydrant system with foam trolley attachment within premises and separate storage of water for the same shall be ensured by PP.
- g. PP shall take all the necessary steps for control of storage hazards within premises ensuring incompatibility of storage raw material and ensure the storage keeping safe distance as per the prevailing guidelines of the concerned authority.
- h. PP shall take all the necessary steps for human safety within premises to ensure tijat no any harm is caused to any worker/employee or labour within premises.
- i. Flame proof electrical fittings shall be provided in the plant premises, wherever applicable.
- j. Unit shall never store drum/barrels/carboys of incompatible material/chemical together.
- k. Unit shall provide effective Isolation for Process area and storage of hazardous chemicals
- I. The project management shall prepare a detailed Disaster Management Plan (DMP) for the project as per the guidelines from Directorate of Industrial Safety and Health. m. Unit shall obtain all required permissions from the Narcotics Control Bureau for manufacturing, storage and handling of Acetic Anhydride & any such chemicals.
- n. Provide double earthling to solvent storage tanks: (1) Unit shall provide effective fire hydrants, water monitors & foam application system at solvent storage tank farm area. (2) Unit shall provide adequate safety system such as water sprinklers, water curtains, foam pouring system etc. to restrict cascade fire emergency in solvent tank farm.
- o. Unit shall never store drum/barrels/carboys of incompatible material/chemical together.
- p. Unit shall provide chlorine leakage control emergency kit and FRP hood with scrubber system for chlorine safety.

	q. Unit shall provide safety valve and rapture disc, as well as auto dump or auto quench/, suppress system for exothermic reaction vessel safety.	
	A. 2 WATER:	
7	Total water requirement for the project shall not exceed 4520 KLD. Unit shall reuse 1264 KLD of treated effluent within premises. Hence, fresh water requirement shall not exceed 3256 KLD and it shall be met through GIDC water supply only. Prior permission from concerned authority shall be obtained for procurement of water.	Please refer condition 2.1 (7) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
8	The industrial effluent generation from the project shall not exceed 1233 KLD.	Please refer condition 2.1 (8) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
9	Management of Industrial effluent shall be as under: 1233 KLD industrial effluent generated from Manufacturing Process (792 KLD), Boiler Blow Down (9 KLD), Cooling Blow Down (332 KLD), Washing (100 KLD), process shall be treated in ETP followed by UF/RO. RO reject (246 KLD) shall be send to Recycling MEE with ATFD and RO-2 Permeate (985 KLD) shall be reused in Cooling tower. Thus there shall be no discharge of any industrial effluent into an environment like drain, land etc and shall maintained Zero Liquid Discharge (ZLD).	Please refer condition 2.1 (9) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
10	Domestic wastewater generation shall not exceed 43.2 KL/day for proposed project and it shall be treated in STP. It shall not be disposed off into soak pit. Treated sewage shall be utilized for gardening and plantation purpose within premises after achieving on-land discharge norms prescribed by the GPCB.	Please refer condition 2.1 (10) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
11	During monsoon season when treated sewage may not be required for the plantation/Gardening/Green belt purpose, it shall be stored within premises. There shall be no discharge of waste water outside the premises in any case.	1
12	Unit shall provide buffer water storage tank of adequate capacity for storage of treated waste water during rainy days.	Please refer condition 2.1 (12) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
13	Complete Zero Liquid Discharge [ZLD] status shall be maintained all the time and there shall be no drainage connection from the premises.	Please refer condition 2.1 (13) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
14	Unit shall feed wastewater to in-house MEE only after ensuring content of effluent for COD/VOC so as not to get air borne during evaporation in order to achieve no adverse impacts on Environment and Human Health.	Please refer condition 2.1 (14) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024

15	Unit shall provide STP and ETP with adequate capacity.	Please refer condition 2.1 (15) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
16	The unit shall provide metering facility at the inlet and outlet of ETP and maintain records for the same.	Please refer condition 2.1 (16) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
17	Proper logbooks of FTP; reuse/ recycle of treated/ untreated effluent; chemical consumption in effluent treatment, quantity & quality of treated effluent, power consumption etc. shall be maintained and shall be furnished to the GPCB from time to time. A.3 AIR	Please refer condition 2.1 (17) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
18	Unit shall not exceed fuel consumption for Boiler, Thermic Fluid Heater and D G Set as mentioned below.	Please refer condition 2.1 (18) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
19	PP shall use approved fuels only as fuel in Boiler, Thermic Fluid Heater and D G Set.	Please refer condition 2.1 (19) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
20	Unit shall provide adequate APCM with flue gas generation sources to achieve the norms prescribed by GPCB.	Please refer condition 2.1 (20) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
21	Unit shall provide adequate APCM with process gas generation sources as mentioned below	Please refer condition 2.1 (21) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
22	The fugitive emission in the work zone environment shall be monitored. The emission shall conform to the standards prescribed by the concerned authorities from time to time (e.g. Directors of Industrial Safety & Health). Following indicative guidelines shall also be followed to reduce the fugitive emission. Internal roads shall be either concreted or asphalted or paved properly to reduce the fugitive emission during vehicular movement. Air borne dust shall be controlled with water sprinklers at suitable locations in the plant. A green belt shall be developed all around the plant boundary and also along the roads to mitigate fugitive & transport dust emission.	Please refer condition 2.1 (22) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
23	Regular monitoring of Volatile Organic Compounds (VOCs) shall be carried out in the work air. area and ambient.	Please refer condition 2.1 (23) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024

24	For control of fugitive emission, VOCs, following steps shall be followed:	Please refer condition 2.1 (24) of SEAC/GJ/IND3/458014/7503/2024 dated
	a. Closed handling and charging system shall be provided for chemicals.b. Reflux condenser shall be provided over Reactors/Vessels.	12th July-2024
	b. Neriux condenser shall be provided over Reactors, vessers.	
	c. Pumps shall be provided with mechanical seals to prevent leakages.	
	d. Air borne dust at all transfers operations/points shall be controlled	
	either by spraying water or providing enclosures.	
25	Solvent management shall be carried out as follows:	Please refer condition 2.1 (25) of SEAC/GJ/IND3/458014/7503/2024 dated
	Measures shall be taken to reduce the process vapors emissions as far	12th July-2024
	as possible. Use of toxic solvents shall be minimum. All venting	,
	equipment shall have vapour recovery system	
	Reactor shall be connected to adequate chilling system to condensate	
	solvent vapors and reduce solvent losses.	
	Reactor and solvent handling pump shall have mechanical seals to prevent leakages.	
	The condensers shall be provided with sufficient HTA and residence time so as to achieve maximum solvent recovery.	
	Solvents shall be stored in a separate space specified with all safety measures.	
	Proper earthing shall be provided in all the electrical equipment	
	wherever solvent handling is done.	
	Solvent storage and handling area shall be flame proof. The solvent	
	storage tanks shall be provided with breather valve to prevent losses.	
26	Close loop solvent recovery system with adequate condenser system	Please refer condition 2.1 (26) of
	shall be provided to recover solvent vapours in such a manner that	SEAC/GJ/IND3/458014/7503/2024 dated
	recovery shall be maximum and recovered solvent shall be reused in	12th July-2024
	the process within premises.	
27	Leak Detection and Repair (LDAR) program shall be prepared and	Please refer condition 2.1 (27) of
	implemented as per the CPCB guidelines. LDAR Logbooks shall be	SEAC/GJ/IND3/458014/7503/2024 dated
	maintained.	12th July-2024

28	Regular monitoring of ground level concentration of PM10, PM2.5, SO2, NOx, HCl, Cl2 and VOCs shall be carried out in the impact zone and its records shall be maintained. Ambient air quality levels shall not exceed the standards stipulated by the GPCB. If at any stage these levels are found to exceed the prescribed limits, necessary additional control measures shall be taken immediately. The location of the stations and frequency of monitoring shall be decided in consultation with the GPCB.	Please refer condition 2.1 (28) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
A.4	SOLID/HAZARDOUS WASTE:	
29	All the hazardous/ solid waste management shall be taken care as mentioned below.	Please refer condition 2.1 (29) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
30	Authorized end-users shall have permissions from the concerned authorities under the Rule 9 of the Hazardous and Other Wastes (Management and Transboundary Movement) Rules 2016.	Please refer condition 2.1 (30) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
31	Unit shall explore the possibilities for environment friendly methods like co-processing of hazardous waste for disposal of Incinerable & land fillable wastes before sending to CHWIF & TSDF sites respectively.	Please refer condition 2.1 (31) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
32	The project proponent has to obtain membership of TSDF site & CHWIF before obtaining CTO of GPCB.	Please refer condition 2.1 (32) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
33	STP sludge shall be collected and used as manure in gardening activity or send to TSDF site for landfilling.	Please refer condition 2.1 (33) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
34	Management of fly ash shall be as per the Fly ash Notification 2009 & its amendment time to time and it shall be ensured that there is 100% utilization of fly ash to be generated from the unit.	Please refer condition 2.1 (34) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
35	The unit shall submit the list of authorized end users of hazardous wastes along with MoU signed with them at least two months in advance prior to the commencement of production. In the absence of potential buyers of these items, the unit shall restrict the production of the respective items.	Please refer condition 2.1 (35) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
	A. 5 OTHER:	
36	The project proponent shall carry out the activities of amount of Rs. 7.95 Crores proposed under CER in surrounding village as per listed for various programs. and it shall be part of the Environment Management Plan (EMP) as per the MoEF&CC's OM no. F. No. 22-65/2017-4A.III dated 30.09.2020. This shall be monitored and the monitoring report shall be submitted to the regional office of MoEF&CC as a part of half-yearly compliance report and to the District Collector. The monitoring report shall be posted on the website of the project proponent.	Please refer condition 2.1 (37) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024

37	All the recommendations, mitigation measures, environmental protection measures and safeguards proposed in the EIA report of the project prepared by M/s. Kadam Environmental Consultants and submitted by the project proponent and commitments made during presentation before SEAC and proposed In the EIA report shall be strictly adhered to in letter and spirit.	Please refer condition 2.1 (38) of SEAC/GJ/IND3/458014/7503/2024 dated 12th July-2024
В	GENERAL CONDITIONS:	
B.1	CONSTRUCTION PHASE:	
38	Water demand during construction shall be reduced by use of curing agents, super plasticizers and other best construction practices.	Noted for compliance
39	Project proponent shall ensure that surrounding environment shall not	Noted for compliance
	be affected due to construction activity. Construction materials shall be	Currently we have not started construction
	covered during transportation and regular water sprinkling shall be	work. Land leveling work and boundary
	done in vulnerable areas for controlling fugitive emission.	work is completed
40	All required sanitary and hygienic measures shall be provided before	Noted for compliance
	starting the construction activities and to be maintained throughout	
	the construction phase.	
41	First Aid Box shall be made readily available in adequate quantity at all	Noted for compliance
	the times.	
42	The project proponent shall strictly comply with the Building and other	Noted for compliance
	Construction Workers' (Regulation of Employment & Conditions of	·
	Service) Act 1996 and Gujarat rules made there under and their	
	subsequent amendments. Local bye-laws of concern authority shall be	
	complied in letter and spirit.	
43	Ambient noise levels shall conform to residential standards both during	Noted for compliance
	day and night. Incremental pollution load on the ambient air and noise	We will monitor the ambient noise level.
	quality shall be closely monitored during construction phase.	
44	Use of Diesel Generator (DO) sets during construction phase shall be	Noted for compliance
	strictly equipped with acoustic enclosure and shall conform to the EPA	We will equipped with acoustic enclosure in
	Rules for air and noise emission standards.	diesel generator during construction phase
45	Safe disposal of waste water and municipal solid wastes generated	Noted for compliance
	during the construction phase shall be ensured.	·
46	All topsoil excavated during construction activity shall be used in	Noted. We will comply with the
	horticultural/landscape development within the project site.	requirement during construction work.
47	Excavated earth to be generated during the construction phase shall be	Noted for compliance
	utilized within the premises to the maximum extent possible and	·
	balance quantity of excavated earth shall be disposed off with the	
	approval of the competent authority after taking the necessary	
	precautions for general safety and health aspects. Disposal of the	
	excavated earth during construction phase shall not create adverse	
	effect on neighboring communities.	
	- 0 - 1 0 - 1 - 1 - 1	

48	Project proponent shall ensure use of eco-friendly building materials	Noted.
	including fly ash bricks, fly ash paver blocks, Ready Mix Concrete [RMC]	We will ensure to use of eco-friendly
	and lead free paints in the project.	building materials.
49	Fly ash shall be used in construction wherever applicable as per	Noted for compliance
	provisions of Fly Ash Notification under the E.P. Act, 1986 and its	
	subsequent amendments from time to time.	
50	"Wind-breaker of appropriate height ie. 1/3rd of the building height	Noted for compliance
	and maximum up to 10 meters shall be provided. Individual building	,
	within the project site shall also be provided with barricades.	
51	"No uncovered vehicles carrying construction material and waste shall	Noted for compliance
	be permitted."	·
52	"No lose soil or sand or construction & demolition waste or any other	Noted for compliance
	construction material that cause dust shall be left uncovered. Uniform	·
	piling and proper storage of sand to avoid fugitive emissions shall be	
	ensured."	
53	Roads leading to or at construction site must be paved and blacktopped	Noted for compliance
	(i.cmetallic roads).	
54	No excavation of soil shall be carried out without adequate dust	Noted we will comply with the requirement
	mitigation measures in place.	
55	Dust mitigation measure shall be displayed prominently at the	Noted. We will prepare and display the dust
	construction site for easy public viewing.	mitigation measure during construction
		work
56	Grinding and cutting of building materials in open area shall be	Noted for compliance
	prohibited.	
57	Construction material and waste should be stored only within	Noted
	earmarked area and road side storage of construction material and	We will store the construction material and
	waste shall be prohibited.	waste at designated location only.
58	Construction and demolition waste processing and disposal site shall	Noted. We will comply with the
	be identified and required dust mitigation measures be notified at the	requirement.
D 2	site. (If applicable).	
B.2	OPERATION PHASE:	
59	B.2.1 WATER: The water meter shall be installed and records of daily and monthly	Noted.
39	water consumption shall be maintained.	We will install the water meters and
	water consumption shall be maintained.	maintain the records on regular basis as per
		requirement
60	All efforts shall be made to optimize water consumption by exploring	Noted
	Best Available Technology (BAT). The unit shall continuously strive to	We will comply with the requirement.
	reduce, recycle and reuse the treated effluent.	The true comply with the requirement.
1		
	B.2.2 AIR:	

		A P I.
61	In case of use of spray dryer, the unit shall provide the adequate &	Not applicable
	efficient APCMs with spray dryer so that there should not be any	
	adverse impact on human health & environment. Unit shall carry out	
	third party monitoring of the proposed Spray dryer & it's APCM through	
	the credible institutes and study report for impacts on Environment	
	and Human Health shall be submitted to GPCB every year along with	
	half yearly compliance report	
62	Acoustic enclosure shall be provided to the DG sets (If applicable) to	Noted
	mitigate the noise pollution and shall conform to the EPA Rules for air	We will comply with the condition
	and noise emission standards.	requirement
63	Stack Vents (Whichever is applicable) of adequate height shall be	Noted
	provided as per the prevailing norms for flue gas emission/Process gas	We will provide the adequate stack height
	emission.	to meet with the requirement
64	Flue gas emission & Process gas emission (If any) shall conform to the	Noted for compliance during operation
	standards prescribed by the GPCB/CPCB/MoEF&CC. At no time,	phase
	emission level should go beyond the stipulated standards.	
65	All the reactors/vessels used in the manufacturing process shall be	Noted for compliance during operation
	closed to reduce the fugitive emission.	phase
	B.2.3 HAZARDOUS/SOLID WASTE:	
66	The company shall strictly comply with the rules and regulations with	Noted for compliance during operation
	regards to handling and disposal of Hazardous waste in accordance	phase
	with the Hazardous and Other Wastes (Management and	
	Transboundary Movement) Rules 2016, as may be amended from time	
	to time. Authorization of the GPCB shall be obtained for	
	collection/treatment/storage/disposal of hazardous wastes.	
67	Hazardous wastes shall be dried, packed and stored in separate	Noted for compliance during operation
	designated hazardous waste storage facility with pucca bottom and	phase
	leachate collection facility, before its disposal.	·
68	The unit shall obtain necessary permission from the nearby TSDF site	Noted
	and CHWIF. (Whichever is applicable)	We will obtain necessary permission from
		the nearby TSDF before start-up the
		operation.
69	Trucks/Tankers used for transportation of hazardous waste shall be in	Noted for compliance during operation
	accordance with the provisions under the Motor Vehicle Act, 1988, and	phase
	rules made there under.	
70	The design of the Trucks/tankers shall be such that there is no spillage	Noted for compliance during operation
	during transportation.	phase
71	All possible efforts shall be made for Co-Processing of the Hazardous	Noted.
	waste prior to disposal into TSDF/CHWIF	We will try our best and will do all possible
		efforts to made the co-processing of waste
		prior to disposal to TSDF as per requirement
		prist to disperse to tobe do per regulierierie

7.0		A
72	Management of fly ash (If any) shall be as per the Fly ash Notification	Noted for compliance during operation
	2009 & its amendment time to time and it shall be entured that there	phase
	is 100% utilization of fly ash to be generated from the unit.	
	B.24 SAFETY:	
73	The occupier/manager shall strictly comply the provisions under the	Noted for compliance during operation
	Factories Act 1948 and the Gujarat Factories Rules 1963	phase
74	The project authorities shall strictly comply with the provisions made	Noted for compliance before start-up.
	in Manufacture, Storage and Import of Hazardous Chemicals Rules	
	(MSIHC) 1989, as amended time to time and the Public Liability	
	Insurance Act for handling of harardous chemicals etc. Necessary	
	approvals from the Chief Controller of Explosives and concerned Govt.	
	Authorities shall be obtained before commissioning of the project.	
	Requisite On-site and Off-site Disaster Management Plans have to be	
	prepared and implemented.	
75	Main entry and exit shall be separate and clearly marked in the facility.	Noted for compliance. We will provide the
		main entry and exit as per requirement
		before project start-up.
76	Sufficient peripheral open passage shall be kept in the margin area for	Noted for compliance during operation
	free movement of fire tender/ emergency vehicle around the premises.	phase
78	Storage of flammable chemicals shall be sufficiently away from the	Noted for compliance during operation
	production area.	phase
79	Sufficient number of fire extinguishers shall be provided near the plant	Noted. We will comply the requirement
	and storage arca.	during operation phase
80	All necessary precautionary measures shall be taken to avoid any kind	Noted for compliance
80	of accident during storage and handling of toxic hazardous chemicals.	Noted for compliance
81	All the toxic/hazardous chemicals shall be stored in optimum quantity	Noted. We will store the chemicals and will
01		
	and all necessary permissions in this regard shall be obtained before	obtain the necessary permissions as per
02	commencing the expansion activities.	requirement.
82	The project management shall ensure to comply with all the	_
	environment protection measures, risk mitigation measures and	assessment during EIA study. Compliance
	safeguards mentioned in the Risk Assessment report.	points will be ensured during operation
		activity.
83	Only flame proof electrical fittings shall be provided in the plant	Noted. We will consider the same before
	premises.	start-up as per applicable area.
84	Storage of hazardous chemicals shall be minimized and it shall be in	Noted. We will provide hazardous chemical
	multiple small capacity tanks/containers instead of one single large	storage as per requirement before start-up
	capacity tank/containers.	of project
85	All the storage tanks shall be fitted with appropriate controls to avoid	Noted. We will constructed Bund/dyke
	any leakages. Bund/dyke walls shall be provided for storage tanks for	walls for storage tanks for Hazardous
	Hazardous Chemicals.	Chemicals as per requirement.
	1	

86	Handling and charging of the chemicals shall be done in closed manner by pumping or by vacuum transfer so that minimal human exposure occurs.	Noted. We will comply the requirement during operation phase
87	Tie up shall be done with nearby health care unit/doctor for seeking immediate medical attention in the case of emergency. Personal Protective Equipment (PPEs) shall be provided to workers and its usage shall be ensured and supervised.	Noted. We will comply the requirement during operation phase
88	First Aid Box and required Antidotes for the chemicals used in the unit shall be made readily available in adequate quantity.	Noted. We will comply the requirement during operation phase
89	Training shall be imparted to all the workers on safety and health aspects of chemicals handling.	Noted. We will comply the requirement during operation phase
90	Occupational health surveillance of the workers shall be done and its records shall be maintained. Pre-employment and periodical medical examination for all the workers shall be undertaken as per the Factories Act & Rules.	Noted. We will comply the requirement during operation phase
91	Transportation of hazardous chemicals shall be done as per the provisions of the Motor Vehicle Act & Rules.	Noted. We will fulfil the requirement as per condition before start-up
92	The company shall implement all preventive and mitigation measures suggested in the Risk Assessment Report.	Noted. We will comply the requirement during operation phase
93	Necessary permissions from various statutory authorities like PESO, Factory Inspectorate and others shall be obtained prior to commissioning of the project. B.2.5 NOISE:	Noted. We will obtain all necessary permissions from concerned authority before start-up project work.
94	The overall noise level in and around the plant area shall be kept well within the standards by providing noise control measures including engineering controls like acoustic insulation hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise level shall confirm to the standards prescribed under The Environment (Protection) Act, 1986 & Rules.	Noted. We will comply the requirement during operation phase
	B.2.6 CLEANER PRODUCTION AND WASTE MINIMISATION:	
95	The unit shall undertake the Cleaner Production Assessment study through a reputed institute/organization and shall form a CP team in the company. The recommendations thereof along with the compliance shall be furnished to the GPCB.	Noted. We will comply the requirement during operation phase
96	The company shall undertake various waste minimization measures such as:	Noted. We will comply the requirement during operation phase.
	a. Metering and control of quantities of active ingredients to minimize waste.	
	b. Reuse of by-products from the process as raw materials or as raw materials substitutes.	

	c. Use of automated and close filling to minimize spillages.	
	d. Use of close feed system into batch reactors.	
	e. Venting equipment through vapour recovery system.	
	f. Use of high pressure hoses for cleaning to reduce wastewater generation.	
	g. Recycling of washes to subsequent batches.	
	h. Recycling of steam condensate.	
	i. Sweeping/mopping of floor instead of floor washing to avoid effluent generation.	
	j. Regular preventive maintenance for avoiding leakage, spillage etc.	
	B.2.7 GREEN BELT AND OTHER PLANTATION:	
97	The unit shall develop green belt within premises as per the CPCB	Noted
	guidelines. However, if the adequate land is not available within the	We will comply with condition as per
	premises, the unit shall take up adequate plantation on road sides and	requirement.
	suitable open areas in GIDC estate or any other open areas in	·
	consultation with the GIDC/GPCB and submit an action plan of	
	plantation for next three years to the GPCB.	
98	Drip irrigation/low-volume, low-angle sprinkler system shall be used for	Noted. We will comply the requirement
	the green belt development within the premises.	during operation phase
99	The PP shall develop green belt (14,565 Sq m (25%) inside plant	Noted
	premises + 8,738 Sq m (15%) at GIDC Jhagadia (Outside plant premises)	We will comply with condition as per
	= Total: 23,303 Sq. m.) i.e. 40% of total plot area] as submitted before	requirement.
	SEAC. Green belt shall be developed with native plant species that are	·
	significant and used for the pollution abatement as per the CPCB	
	guidelines. It shall be implemented within 3 years of operation phase	
	in consultation with GPCB.	
B.3	OTHER CONDITION	
100	The projects covered under category5(f) shall undergo the safety and	Noted
	environment audit regularly as per the standards laid down by the GPCB and CPCB	
101	PP shall carry out the safety audit and Risk assessment Report as per	Noted
	the prevailing guidelines of safety.	We will comply with condition as per
		requirement.

102	Management of Fly ash shall be as pe the Fly ash notification 2009 & its	Noted
	amendment from time to time and it shall be ensured that there is 100	
	% utilization of fly ash to be generated from the unit.	
103	EMP should invariably include provisions for environmental monitoring	Noted
	and measures for noise pollution control measures.	
104	In EMP proponent should separately indicate majors of occupational	Noted
	health, fire and safety measures.	
105	Prior EC is granted is subject to the proponent receiving all statutory	Noted
	permission / clearances / certificates and membership of respective	
	agencies / authorities which ever applicable. Proponent shall inform	
	progress from time to time, in six monthly compliance report to	
	MOEFCC / SEIAA / SEAC / GPCB failing to which this provisional EC will	
	stand withdrawn.	
106	Wherever waste water or chemical water to be collected by tankers	Noted
	and transported to CETP etc. any diversion and disposal in open	We will comply with condition as per
	drainage (nallah) etc. causing human and environmental damage or	requirement.
	loss will make it liable for action under the law.	·
107	All transport movement by tankers etc has to be done with	Noted. We will comply the requirement
	maintenance of gate pass and logbook it should be verified by the	during operation phase
	inspecting authorities.	
108	Non hazardous waste data shall be informed to GPCB time to time so	Noted. We will comply the requirement
	as to make an assessment and tie up with industry for generating	during operation phase
	sustainable power from the waste.	
109	All chemical pharma industry etc. should ensure predictive and	Noted. We will comply the requirement
	preventive maintenance of factory/ boiler and reactive show as to	during operation phase
	avoid incident of fire and safety hazards.	
110	EMP should include STP and detail cost including maintenance,	Noted. We will comply the requirement
	transportation of wastewater to CETP/ CMEE etc as well as	during operation phase
	transportation cost or transit cost.	
111	In LDAR preventive and predictive maintenance plan	Noted
112	In LDAR leakage component, source of equipment leak, detention	Noted
	method should be given in table form.	
113	In Storage component should be shown separately in terms whether	Noted. We will meet the requirement as
	inflammable, toxic, corrosive, reactive etc.	per condition during operation phase
114	In case of Fly Ash generation its management and disposal should be as	Noted
	per Government of India Notification and 100 % utilization should be	
	ensured.	
115	Project proponent shall install all environment management systems as	Noted. We will install all required EMS
113	pe the CPCB/ GPCB directives regarding the effluent discharge and air	during operation phase.
	emission in working condition	daming operation phase.
116	Project proponent shall display the copy of Environment Clearance at	Noted.
110	the site prominently	Noted.
	the site profilliently	

117	Project proponent shall prepare and follow regular and preventive maintenance plan. The copy of same shall be submitted to SEIAA.	Noted
118	Project proponent will have to display the safety procedure in working area.	Noted
119	The Project proponent shall obtain all required permissions for safety, health and fire from competent authorities like PESO/Fire Authority etc. and intimate SEIAA.	Noted. We will obtain all required permission from concerned authority before start-up the project
120	Project will intimate SEIAA/SEAC/GPCB after obtaining the membership of common facilities like CETP/TSDF/CMEE/CHWIF/Common spray dryer as the case may be.	Noted. We will obtain Membership from concerned facility before start-up the project.
121	Extra care will be taken by PP to avoid any accidental blast in boiler, reactor or any machinery in the plant	Noted
122	Environment monitoring , training and disaster management plan should be undertaken and complied at regular interval.	Noted
123	Integrated Regional Office of MoEF & CC, Gandhinagar and GPCB will monitor all environment, safety & health norms as pe the prevailing rules.	Noted
124	The PP has to maintain the logsheets / registers / manifest / gate pass for discharge through tankers and SCADA system for pipeline discharge for the wastewater generation and its disposal data and submit to the GPCB every quarter. GPCB shall verify the same on regular basis and inform SEIAA and take legal action in the cases of non compliance.	Noted for compliance before project start- up
125	Unit shall comply all the applicable standard conditions prescribed in office memorandum (OM) published by MoEF & CC vide no. F . No. 22-34/2018-IA.III dated 09/08/2018 for pharmaceutical and chemical industries mentioned at (Sr. No. XX)	Noted. We will fulfil the requirement during operation phase
126	The Project proponent shall allocate the separate fund for corporate Environment Responsibility (CER) in accordance to the MoEFCC's Office Memordandum No. F.No. 22-65/2017-IA.III dated 01/05/2018 to carry out the activities under CER in affected area around the project. The entire activities proposed under CER shall be monitored and the monitoring report shall be submitted to the regional office of MoEFCC as a part of Half – yearly compliance report and to district collector.
